PROFILE

- **Current role**
  Software QA Engineer
- **Languages**
  JavaScript / TypeScript – Python – HTML – CSS
- **Frameworks**
  Cypress – Selenium – Playwright

Electronic Engineer from the Autonomous University of Baja California with professional experience as a QA Engineer focused on manual testing. Skilled in applying core testing methodologies including functional, regression, exploratory, and usability testing to ensure reliable and high-quality web applications.

Experienced in analyzing application behavior, identifying defects, and validating complex user flows. Strong ability to reproduce issues, work with logs and system responses, and collaborate with development teams to support efficient resolution and continuous improvement.

Hands-on experience with web technologies (HTML, CSS) and a solid understanding of how frontend and backend interactions affect system performance and user experience. Familiar with Git for version control and CI/CD environments such as Jenkins.

Continuously developing automation skills through personal projects using Selenium and Playwright, applying them to complement manual testing practices and improve efficiency in repetitive validations.

I approach my work with professionalism and respect, valuing clear communication and collaboration when addressing challenges. I focus on understanding problems thoroughly and contributing to well-reasoned, effective solutions that benefit both the team and the end user.

Interested in roles that involve problem-solving, system analysis, and improving reliability in how applications behave and interact with users. Known for attention to detail, clear communication, and a consistent focus on quality.

PROFESSIONAL EXPERIENCE

Nov 2023 – Actual Position

Software QA Engineer

Dilato InfoTech, Ensenada Baja California, Mexico.

- End-to-End (E2E) Testing, Regression Testing, Smoke Testing, Functional Testing, Exploratory Testing, Usability Testing.
- Write detailed test cases that describe step-by-step how to validate a feature.
- Create test plans and contribute to QA documentation.
- Document expected results for different inputs and user flows.
- Manually execute test cases by interacting with the application (UI).
- Use various browsers, devices, and configurations to validate functionality.
- Log defects clearly in a bug-tracking system (Jira).
- Work closely with developers, product owners, and automation testers.
- Join sprint meetings, grooming, and planning sessions in Agile teams.

Apr 2022 – Nov 2023

Licensing Brand Coordinator

Mad Engine/Fortune fashions, Ensenada Baja California, Mexico.

- Managed license regulations, ensuring terms such as territories, durations, and usage rights were properly applied and up to date.
- Oversaw product compliance to guarantee licensed garments adhered to brand guidelines and design specifications set by licensors.
- Acted as the main liaison with licensors, coordinating product submissions, approvals, and maintaining clear communication throughout collaborations.
- Collaborated closely with design, production, sales, and marketing teams to ensure alignment with licensing requirements and timelines.
- Ensured all licensed products complied with legal and intellectual property regulations, preventing misuse of trademarks or brand assets.
